

PROVIDERnet® Quick Start Guide

STEP 1 REGISTER

Register at service.pac.bluecross.ca/providerregistration.

Ensure you have this information prior to registering:

- Provider office — Legal business name, address, CDAnet office number, contact information, unique email address.
- Practitioner — Registration number, UIN number, registration effective date, unique email address. If you are an independent practitioner and don't have a unique email address, you can use a fake email address in the format of firstlastname@email.com (i.e. patsmith@email.com).
- Primary administrator — Contact information for the individual who sets up direct deposit, views claims statements and may be submitting claims on behalf of practitioners for the provider office.

This can be an office manager or front desk staff. Email addresses may be the same as the provider office email, but must be different than the practitioner email.

Review

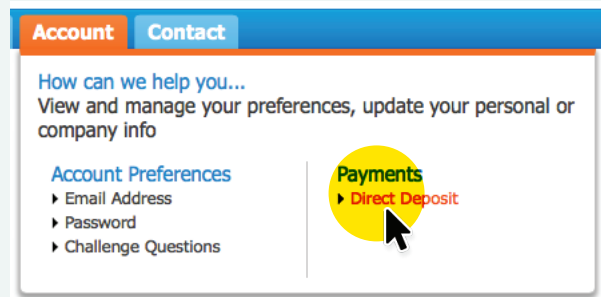

Pacific Blue Cross will review your information and approve or reject your registration.

Activate your account

Once approved, activation emails will be sent. Follow the instructions to set up your user account, challenge questions and password.

STEP 2 SET UP BANKING

The primary administrator must set up direct deposit before submitting the first claim. Navigate to the *Account* tab and click *Direct Deposit*.

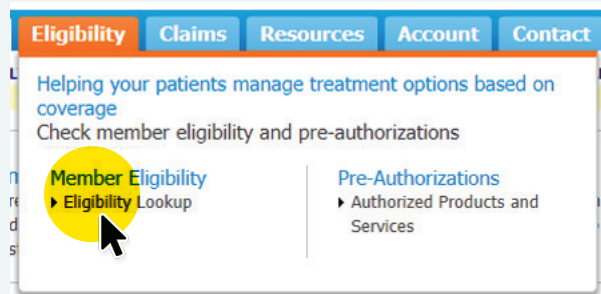

Ensure you have banking details.

One bank account is required per provider office.

STEP 3 CHECK A MEMBER'S ELIGIBILITY

Navigate to the *Eligibility* tab and click *Eligibility Lookup*.
